Revascent

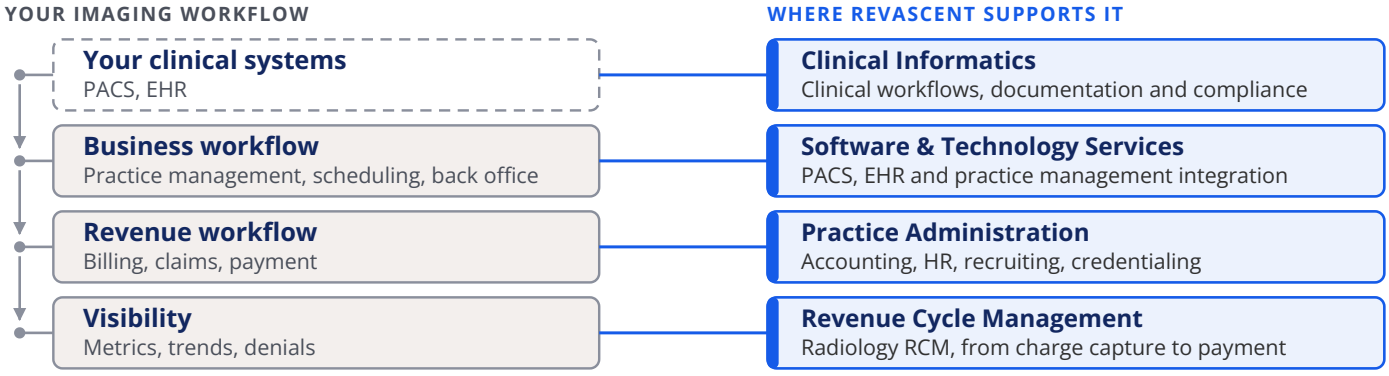

THE BUSINESS BEHIND THE IMAGE

Your imaging is connected. Is your business?

Technology, operations and revenue cycle support for imaging centers and radiology groups, from one partner.

Every imaging study moves through scheduling, the scanner, the report, billing and payment, sometimes across different systems and sites. Where handoffs mean re-entering information, the business can fall behind the imaging.

What happens between the order and the payment?

How Revascent connects the business behind your imaging

Systems that work together

Integration between your PACS, EHR and practice management system for a more efficient billing workflow, plus cloud-based server hosting.

Support for what you already use

Vendor-agnostic support for EHR, practice management, hosting, interfaces and security, for fewer disruptions and faster issue resolution.

Operations that scale

Practice administration that can serve as your CFO/COO: accounting and finance, HR, recruiting and staffing, and credentialing.

Revenue and visibility, connected

Radiology revenue cycle management and a revenue management dashboard that puts your financial pulse in one place.

One partner across technology, operations and revenue.

The people supporting your systems understand how imaging gets paid.

- **Human-led.** Concierge-level service, with human oversight supported by technology.
- **Built for independents.** Support to grow without giving up independence.
